Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 23-36, drawn to methods of treatment using a composition comprising a bacteriophage, classified in class 424, subclass 93.6.
- II. Claims 37-50, drawn to methods of treatment using a combination of two or more bacteriophage, classified in class 424, subclass 93.6.

The inventions are distinct, each from the other because of the following reasons:

The two inventions are separate and distinct from one another, as they are differing methods, using differing reagents to reach differing goals. Invention I uses 1 strain of bacteriophage, to treat a single type of infection, while Invention II uses two or more strains of bacteriophage to treat more than one type of infection. As such, the search and examination of both Inventions would not be completely coextensive in scope.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
